FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

EX PARTE OR LATE FILED

MM Docket No. 99-25

Regarding The Creation of Low Power FM Licenses: RM-9242, RM-9208

Dear Honorable Chairman Kennard,

We are writing to commend you and the Federal Communications Commission for taking action on an issue of great importance to us - ending the 21-year ban on community access to the airwaves. We have become increasingly concerned about the growing concentration of the media in our country and are pleased that the Commission is responding to public outcry to increase opportunities for local communities to use our radio airwaves.

One of the fundamental tenets of our democracy is to ensure that diverse interests have opportunities to express themselves, not merely to be the recipients of what a handful of other people tell them. It is a nonnegotiable component of our right to a free press and free speech.

Radio is perhaps the most qualified of any media outlet to provide community access. It is a relatively inexpensive medium to produce and is well-suited to cover community issues and local culture. Unfortunately, over the past three years the U.S. radio broadcasting industry has experienced an unprecedented wave of consolidation and mergers. As a result, the electronic medium best suited to inexpensive, local programming has become arguably the most regimented and centralized of our major media. Even a multimillionaire would have trouble entering the radio broadcasting industry today, because economies of scale (permitted by deregulation) demand that a firm own numerous stations in several markets to be even remotely competitive. As for the person of average means, their lot is limited to being a passive consumer of an increasingly monopolistic industry that has less and less competitive pressure to heed the

No. of Copies rec'd
List ABCDE

Handwritten signature/initials.

diverse, local needs of listeners. And, for poor people and others who are considered unimportant to the advertising community, radio increasingly has little to offer. Again, the great tragedy of this situation is that radio is the ideal medium to provide an accessible local service for democratic communications of interest and value to the entire population.

Awarding licenses for new low power FM radio stations would empower local communities with a new public forum to express its many voices, cultures, ideas, and needs. Low power radio stations would create much needed public fora for a variety of groups - including community activists, youth, ethnic and linguistic minorities, the religious community, local artists and cultural associations - and provide a forum for dialogue and debate about important local and public interest issues. These kinds of stations would strengthen community identity in urban neighborhoods, rural towns and other communities which are currently too small to win attention from "mainstream", profit-driven media.

The strong interest in independent radio stations shows that the creation of low power radio service would have wide public support. The tremendous demand for microradio is demonstrated by the emergence of a national Free Radio Movement, widespread civil disobedience, constitutional challenges of the Commission's aggressively enforced 21-year ban, as well as the proliferation of unlicensed community radio stations supported by local government, whose operators broadcast at the risk of financial losses, seizure of property, arrest, and in some cases, imprisonment.

In addition, the Commission has stated that in the last year alone, 13,000 people inquired regarding the possibility of obtaining a license for low power broadcasting in their communities. In support with the efforts of the Microradio Empowerment Coalition (mec@tao.ca), we urge you to legalize microradio in order to benefit non-commercial community groups whose interest in microradio is to communicate, to educate, and to inform, not to make money. We are confident you agree that broad citizen access to information and culture is at the heart of a democratic society.

To support this vision, we urge you to legalize microradio with the following concerns in mind:

1. Microradio licenses should be awarded for non-commercial use only. The current radio spectrum is dominated by commercial media. LPFM licenses should go to non-commercial community groups who want to use radio to communicate with their neighbors, not make profit from them.
2. Licenses should be held locally, be non-transferable, affordable to all communities, easy to apply for and limited to one per license holder; they should NOT be businesses.
3. Power levels should be up to 100 watts in urban areas and up to 250 watts in rural areas.
4. The Commission should NOT diminish new low-power stations to

"secondary status." It would be a tragedy to take away licenses from low-power community stations just because the Commission subsequently granted a power increase to a pre-existing station or granted a new high power license somewhere nearby.

5. The Commission should grant full amnesty for the microbroadcast pioneers who have suffered government seizure and fines. Their property should be returned. They should be granted equal opportunity in applying for and receiving new licenses.

6. Problems, technical or otherwise, should be referred to the local voluntary micropower organization for assistance or mediation (e.g. the Ham radio model). The FCC should be the forum of last resort.

7. LPFM must be protected and maintained in the future as radio makes the transition from analog to digital broadcasting.

8. If the FCC intends to license some commercial stations, they must be licensed last. In this instance, there should be a 2 year "headstart" for non-commercial licenses. The right of citizens to communicate is protected by the Constitution and the FCC's mandate. The right to make money through local radio is not a protection under the FCC's mandate.

9. Stations should be locally programmed. However recorded materials such as music, poetry, documentaries, features etc. may be used. Sharing of program materials and resources among micro and community stations is strongly encouraged. No more than 20% of air time from off-site feeds or syndicated tapes.

10. Licenses should be awarded to unincorporated non-commercial associations, and non-profit organizations.

11. Within two years new spectrum space (including any future digital spectrum space) should be allocated for continued expansion of microradio broadcasters so that any community group that wishes to broadcast has access to available spectrum space (frequencies). Further, all manufacturers of consumer radio receivers for sale in the United States should be required to include this spectrum set aside for microradio broadcasters.

12. Licensing fees should be affordable to all communities.

Again, we commend Chairman Kennard and the Commission for your willingness to address these issues. We are hopeful that the creation of a new class of low power FM radio licensing becomes a reality during the Chairman's present term. We look forward to working on making the airwaves more accessible for our local communities.

RECEIVED

JUL 13 1999

FEDERAL COMMUNICATIONS COMMISSION
 OFFICE OF THE SECRETARY

NAB Lobbying Material

This Lie Perpetrated by Ed Fritz and Jeff Baumann of The NAB is
 Criminal, and against Free Enterprise of the American Public, As Proposed
 By
 The FCC in Docket MM-99-25 LPFM Community Broadcast Service:

"MICRORADIO

THE ISSUE

Microbroadcasters are radio stations with less than 100 watts that
 transmit signals within a five to 15 mile radius and are operating
 without
 FCC licenses. Currently, there are thousands of pirate microradio
 stations
 in operation all over the country. In addition to being an inefficient
 use
 of the spectrum, the FCC has established that these pirate microradio
 stations create hazardous interference problems, specifically with air
 traffic control towers.

Recently, the FCC has stepped up enforcement against pirate radio. The
 Commission has shut down more than 200 pirates over the past two years.

No. of Copies rec'd 011
 List ABCDE

But Chairman Bill Kennard sees the pirate radio movement as an indication of the public's need for access to broadcasting. In response, he is floating a proposal to license microbroadcasters with one-watt AM/FM stations as a means of expanding opportunities for station ownership.

Unfortunately, this proposal does nothing to address the interference problems that will only increase if thousands of new microradio stations are licensed. Also, the FCC has no means of monitoring these new stations that may start out as one-watt stations but later seek to become full power stations.

INDUSTRY VIEWS

The NAB does not support microradio for the following reasons:

- * The FCC has already stated that a micro- or low power service, of one to 100 watts, is an inefficient use of the spectrum;
- * The development of digital radio technology depends on the existing channel allocations. Adding thousands of new low power stations could jeopardize broadcasters from ever implementing digital radio technology;
- * The FCC does not have the resources to establish a new service that could potentially add hundreds, if not thousands of new low power stations. The Commission would face extraordinary burdens in licensing new low power stations, solving interference problems, and policing power cheaters if a low power service were established;
- * The FCC should not establish an entirely new service to legitimize the pirate broadcasters who are flagrantly violating the law as it exists today.

We the American People Elected You to Supervise (our the Americans Peoples Government) Not Yours we pay you for services rendered.

Give us the Opportunity to own an Operate a LPFM Broadcast Community Business and Service,as Proposed by The FCC Docket MM 99-25

Our nation is, conceived in liberty, and dedicated to the proposition that all men are created equal.- that our nation, under God, shall have freedom and that government of the people, by the people, for the people, shall not perish from the earth,and that Woman,Blacks,Hispanics,and the Less Fortunate,have the right to Achieve Free Enterprise,and earn a Liveing in the United States Of America: As Proposed by the FCC in there Adoption of LPFM Broadcast Service,for those Citizens who want to Achieve a Community Broadcast Service and Business.

Rep. Billy Tauzin of

Louisiana said the Federal Communications Commission plan for so-called microradio would reduce the audience and advertising revenue of current stations and possibly create severe interference.

Look at the above Statement and Tauzin is our Represenative,he flat out tells us and the FCC sorry but you dont have any Civil Rights and you can not Operate a Business in the

United States,because It will take MONEY OUT OF MY POCKETS AND MY GOOD OLD BUDDIES THE RADIO CONGLOMERATES AND MOST OF ALL MY GOOD OLD BOY ED THE MONEY CHANGER FRITZ OF THE NAB!! This statement by Tauzin is a Obtusive and Contrary to laws and customs

of our Nation,Tauzin and the NAB are Stealing my right to Own an operate a Free Enterprise Business in the United States,they are Stealing my Freedom

Of Expression,an my Civil Rights and my Free Speech !)

We exercise and or put in to
action our Legal,and Civil Rights,and abide by the Law Of a free
Democracy,Governed by and for the people,with fair,
responsible,and,accountable representation by our Elected Officials.

Folks, THIS IS EPIC. Listed below are the members of the spectrum
Integrity

Task Force of the National Association of Broadcasters. Out of 18 Top
Executives only TWO look like they have anything to do with engineering
in

ther organizations. This shows how badly the NAB gang is looking to
trash

LPRS. Fortunately, this will not go unnoticed at the FCC etc...
either, I

would imagine.

NAB Lobbying Material

This Lie Perpetrated by Ed Fritz and Jeff Baumann of The NAB is
Criminal,and aganist Free Enterprise of the American Public,As Proposed

By
The FCC in Docket MM-99-25 LPFM Community Broadcast Service:

"MICRORADIO

THE ISSUE

Microbroadcasters are radio stations with less than 100 watts that transmit signals within a five to 15 mile radius and are operating without FCC licenses. Currently, there are thousands of pirate microradio stations in operation all over the country. In addition to being an inefficient use of the spectrum, the FCC has established that these pirate microradio stations create hazardous interference problems, specifically with air traffic control towers.

Recently, the FCC has stepped up enforcement against pirate radio. The Commission has shut down more than 200 pirates over the past two years. But Chairman Bill Kennard sees the pirate radio movement as an indication of the public's need for access to broadcasting. In response, he is floating a proposal to license microbroadcasters with one-watt AM/FM stations as a means of expanding opportunities for station ownership.

Unfortunately, this proposal does nothing to address the interference problems that will only increase if thousands of new microradio stations

are licensed. Also, the FCC has no means of monitoring these new stations that may start out as one-watt stations but later seek to become full power stations.

INDUSTRY VIEWS

The NAB does not support microradio for the following reasons:

- * The FCC has already stated that a micro- or low power service, of one to 100 watts, is an inefficient use of the spectrum;
- * The development of digital radio technology depends on the existing channel allocations. Adding thousands of new low power stations could jeopardize broadcasters from ever implementing digital radio technology;
- * The FCC does not have the resources to establish a new service that could potentially add hundreds, if not thousands of new low power stations. The Commission would face extraordinary burdens in licensing new low power stations, solving interference problems, and policing power cheaters if a low power service were established;

* The FCC should not establish an entirely new service to legitimize the pirate broadcasters who are flagrantly violating the law as it exists today.

competing LPFM Broadcast Service,
consumers by cutting its prices and
the quality of its product or services
Competition and the profit
brings also stimulate businesses to
innovative and more efficient methods
production of Radio Service to its

Communitys benefit from competition

through lower prices, better products
 and
 services. Inefficient firms or
 companies
 that fail
 to understand or react to consumer
 needs
 may
 soon find themselves losing out in the
 competitive battle, The NAB With Ed
 Fritz
 and Jeff Baumann.

Honorable Elected Officials: Senators and Congressman:

Keep Free Enterprise, as it is a Civil Right!
 The American People Have A Right To Free
 Enterprise, Contrary To the Big Money Changers Billy Tauzin, And Ed Fritz
 Of
 The NAB and the Radio Conglomerates

Personal liberty includes the right to enter the free market of economic
 activity LPFM Broadcast Service, As Proposed By The FCC Docket MM
 99-25-and
 the free market of ideas. You have the right to participate in the free
 market and speak your mind freely. You have no guarantee of success in
 free
 enterprise, but you have the right to defend yourself against anyone who
 tries to limit or extinguish your right to free enterprise, Such as
 Congressman Billy Tauzin Of Louisiana and Ed Fritz of the NAB . Free
 enterprise built this country. Let's keep building.
